

# MATERIALS ENGINEER

## DUTIES

- ME is the only team member able to approach the material bins.
- ME is responsible for selecting the best combination of materials for specific purposes, as well as proposing alternative material options.
- ME considers the implication of waste and other environmental pollution issues of any product or process.
- ME works to solve problems that may arise during the engineering design process.
- ME proactively coordinates and communicates with other departments during the design, assembly & analysis stages of project.
